Welcome to GFL Environmental — the only major diversified environmental services company in North America offering services in solid waste management, liquid waste management and infrastructure development.

We believe that, by providing safe and accessible environmental solutions, we will encourage greater environmental responsibility and allow our customers and the communities we serve to be **Green For Life.**

DIVERSE

With more than 5,000 employees backing a strategically located network of over 140 North American facilities, GFL proudly supports our customers' environmental stewardship and infrastructure development goals. One of the keys to our success lies in the diversity of our sophisticated services and the people who deliver them. GFL customers receive robust integrated solutions — traditionally provided by multiple third parties — all from a single efficient company.

DEDICATED

GFL's full-spectrum service philosophy provides customers with consolidated yet sophisticated solutions that can be dedicated to support practically any aspect of an environmental project or infrastructure development. GFL is also dedicated to an unwavering focus on safety and ensuring compliance with environmental and legislative requirements.

DRIVEN

At GFL, our motivation to help sustain the environment is simple. By supporting the goals of our community and business partners, we're supporting the smart choices that will ultimately help create a brighter future for us all. From material collection, sorting, transport, recycling and disposal to site excavation, soil remediation and (in some locations) demolition, shoring and caisson work — we are truly driven to provide our customers with the superior resources required to meet their evolving environmental and industrial needs.

SOLID WASTE SERVICES

- Municipal / Residential Waste
- Industrial / Commercial Waste
- Recycling Collection, Processing & Storage
- Landfill Disposal & Diversion
- Organics Processing & Compost Products

GFL's solid waste services include the collection, transportation, transfer, recycling and disposal of solid waste for municipal, residential, commercial, industrial and institutional customers. In addition to a full range of tailored collection and disposal services with 24/7 dispatch, we offer comprehensive waste audits and environmental consulting to make GFL your full-service environmental solutions partner.

Our solid waste facilities include hauling yards, transfer stations, material recovery facilities, organics processing facilities, and landfills — all serviced by our dependable fleet of signature green GFL vehicles.

GFL's services reduce the impacts that customer waste materials can have on public health and the environment, thanks to responsible management practices such as the recovery of reusable resources and the composting of organics.

From municipalities wishing to cut down landfill use and achieve waste diversion targets, to businesses seeking improved sustainability and reduced waste management costs — Green For Life can develop the right solution to address your unique solid waste handling requirements. We will work closely with you and provide the equipment, technology and personnel required to ensure complete, dependable, safe and cost-effective service.

SOLID WASTE SERVICES

LIQUID & SPECIAL WASTE

LIQUID & SPECIAL WASTE

- Automotive Fluid Services
- Vacuum Truck Services
- Hazardous Waste Management
- Emergency Response & Site Remediation
- Specialized Services & Industrial Cleaning

GFL Environmental has the experience, equipment and professional certifications required to safely collect, transport, process and/or dispose of a wide range of hazardous and non-hazardous liquid wastes.

We regularly handle a variety of liquid waste materials — used motor oil, toxic chemicals, contaminated waste water, downstream by-products, septic materials and more — in strict compliance with all government regulations and in accordance with industry best practices.

Depending on your needs, our services can be provided on a scheduled or call-in basis. We can even provide 24/7 HAZMAT emergency spill response services for industrial incidents involving fuel spills, derailments, rollovers, tank overflows and ruptures. GFL responders are trained to manage spills in accordance with required regulatory standards.

We recycle and recover a variety of liquid waste for reuse, including oils, oil filters, antifreeze, waste glycol, solvents, absorbents, dry cleaning fluids, lubricants and light fuels. Our cost-effective customer solutions include recycling and processing services such as blending, neutralizing and solidifying of waste and sludge.

GFL's success is based on pairing the right equipment, personnel and modern procedures with each job in order to ensure consistently safe and efficient service. We handle everything from small-volume pump-outs to tanker loads of hazardous and non-hazardous waste.

Green For Life will assist with the assessment of all your waste streams and recommend ways to reduce or eliminate them. We can also provide a no-obligation quote for the proper collection, storage and shipping of your hazardous and non-hazardous liquid waste.

INFRASTRUCTURE IMPLEMENTATION & SOIL REMEDIATION

- Excavation Division
- Shoring & Foundations Division
- Civil Division
- Demolition Division
- Construction Waste Disposal
- Soil Remediation

The GFL Infrastructure Group has the experience, skills and resources required to provide safe, integrated design-build services for your infrastructure and residential projects. We are a single contractor with the in-house capability required to execute complete earthworks, foundation, demolition and civil scopes of work. Our construction services also include the management of your soil remediation and construction waste disposal needs.

By providing a single point of responsibility, GFL delivers integrated coordination, smooth transitions between tasks, and peace of mind for our clients. To position every project for success prior to commencement, we also offer clients preparatory pre-construction services.

These services include estimating, scope coordination, constructability reviews, scheduling, system and material options analysis, value analysis (engineering) and sustainable material and method analysis.

Our experienced management team of construction professionals and engineers offers more than 270 years of combined construction expertise and industry knowledge. Safe, high-quality execution is our first priority and is incorporated into every stage of what we do — from planning through execution. We also pride ourselves on having a state-of-the-art comprehensive fleet of equipment maintained to the highest standards.

GFL's thoroughly trained and qualified supervisors, workers and operators are supported by our world-class team of health and safety professionals. We ensure that pre-site safety inspections, hazard analyses, tailgate talks and procedures are integrated into all aspects of the subsurface works we perform.

At Green For Life, we will work together with your team — from the budget and design stages through construction — to provide an optimal solution to your project challenge.

INFRASTRUCTURE IMPLEMENTATION & SOIL REMEDIATION

SAFETY & COMPLIANCE

SAFE
— FOR —
LIFE

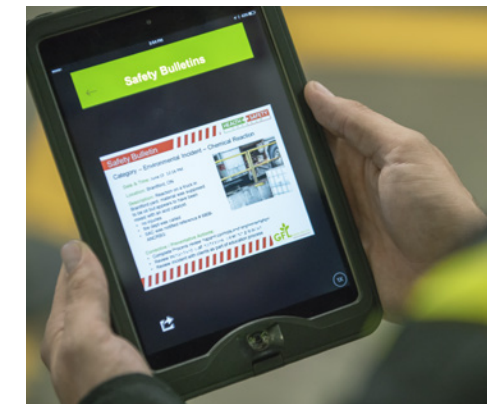

SAFETY & COMPLIANCE

At GFL, the health and safety of our employees, our customers and the communities we serve is the most important commitment we have, and it is incorporated into every stage of what we do — from planning through execution.

Many of the services we provide are carefully scrutinized by governmental agencies and environmental regulators. By way of permits, licences or approvals to operate, GFL has secured and maintains all authorizations from local, provincial, state and federal authorities that are required to provide our broad range of environmental and industrial services.

GFL has adopted robust safety training programs — including regular training, evaluations and support at every level of our company — in order to achieve our safety goals.

We subscribe to nationally recognized standards for competency, including NFPA (National Fire Protection Association), API (American Petroleum Institute) and CSA (Canadian Standards Association), to name a few. We also maintain high ratings in pre-qualification registries such as ISNetworld®, ComplyWorks, Avetta (formerly PICS Auditing) and ContractorCheck.

From our first-class knowledge and strict regulatory compliance to our wide range of evaluation policies, GFL is committed to ensuring that all members of our team make safe execution their first priority and that they complete every task with the utmost attention to safety.

DIVERSE SERVICES. UNIQUE POTENTIAL.

A Single Contracted Diversified Service Provider

- Superior, unified and consistent safety focus and communications
- Opportunities for cross-pollination of service offerings and project efficiencies to reduce costs and eliminate service gaps or overlaps
- Specialized appreciation and detailed understanding of each customer's evolving expectations and relationship
- Fixed scheduling with "as it happens" adaptability
- Excellent relationship and long-term shared experience between customer and integrated service provider
